Professional Summary

Software developer with experience building full-stack web applications, cybersecurity training labs, and IoT dashboards. Skilled in React, Node.js, Python, and SQL, with practical experience creating vulnerability assessment exercises. Seeking opportunities in software development and cybersecurity.

Technical Skills

Languages: JavaScript, Python, Java, C/C++, SQL
Frameworks: React, Node.js, Express, Django
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, Burp Suite, Vercel, VS Code, Docker

Professional Experience

Bug Hunter | Bugcrowd Oct 2025 – Mar 2026
Self-employed

- Conducted penetration testing and vulnerability assessments through bug bounty programs.
- Investigated web application security issues and documented findings for submission to program teams.

Core Developer | Barracks Technologies May 2025 – Oct 2025
Ahmedabad, Gujarat

- Developed web applications and lab environments for a cybersecurity training platform.
- Built intentionally vulnerable applications to support hands-on practice in vulnerability assessment and security reporting.

System Engineer | CEREBULB Nov 2023 – Dec 2024
GIFT City, Gujarat

- Developed IoT-based data collection systems and real-time dashboards for a power generation and distribution client.
- Built tools to help teams monitor operations and track maintenance needs.

Selected Projects

Chillflick | Watch Party Application chillflick.vercel.app

- Developed synchronized YouTube playback and real-time chat for shared viewing sessions.
- **Technologies:** React, Node.js, Socket.IO.

DiagnosAI | Disease Prediction Prototype diagnos-ai.vercel.app

- Built a web interface for a disease prediction model trained on a Kaggle dataset.
- **Technologies:** React, Django, machine learning.

Education

Master of Information Technology Mar 2026 – Dec 2028 (expected)
RMIT University, Melbourne, Australia | In progress

Bachelor in Information Technology 2021 – 2025
LJ Institute of Engineering and Technology | CPI: 8.8/10

Certifications & Recognition

Ethical Hacking Essentials (EHE) – EC-Council Jan 2025
Building Generative AI-Powered Applications with Python – IBM Oct 2024
Employee of the Month – CEREBULB Aug 2024
